

Report Brief
Compliance to Chronic Homeless Data Completion
 For the Month of July 2017

C. Peraro Consulting, HMIS Administrator, State of Hawaii

The CPC HMIS team completed an analysis reviewing data completion for the “Chronic Homeless” fields for new adult intakes (n=1,208) during July 2017. Key findings include:

All Cases Entered during July 2017:

- A total of 191 out of 1,208 (16%) reported MISSING DATA under the Chronic homeless field
- 182 of the 191 intakes (95%) with missing data were new OUTREACH intakes
- Hawaii reported no missing data for the chronic homeless field
- Both Kauai (1) and Maui (2) had very few of the 191 cases with missing data for the chronic homeless field
- Oahu reported 187 out of Oahu’s 846 intakes (24%) with missing data for the chronic homeless field
- **Three Outreach organizations on Oahu accounted for 178 of the 191 cases (93%) with missing data including the CHOW Project (35 missing cases), Kalihi Palama Health Center (90 missing cases) and Waianae Coast Comprehensive Health Center (53 missing cases).**

All Cases active during July 2017:

- A total of 18%, or 1,509 out of 8,230 adults, contained missing data necessary to calculate the chronic homeless field. This is a decrease from the 21% rate reported in June 2017 and a significant decrease compared to the 49% rate of missing data in the January 2017 report.
- Comparing missing data by program, Outreach had the highest level with 44%, followed by Permanent Supportive Housing 13%, Transitional Housing 7%, Rapid Rehousing and Services Only 4%, and Emergency Shelter 3%.
- Homeless Prevention showed a missing rate of 8% (55 cases) with 5 cases reported as chronically homeless. By definition, adults served by homeless prevention programs are not chronically homeless.
- Due to the design of entering street outreach information into the HMIS, the chronic homeless fields are not entered for outreach cases until they become “engaged”, this in turn contributes to high missing CH rates. Interpretation of the missing rate among these cases must take this under consideration.

The following table summarizes the MISSING status of all active ADULT cases (n=8,230) in the system during the month of July 2017 by Program Type. Outreach records represent approximately 75% of all cases with missing data followed by PSH, which represents approximately 11%. Missing rates > 10% are marked in RED.

Type of Program	No	Yes	Missing Data	Grand Total	% Missing
Emergency Shelter (ES)	1,096	312	39	1,447	3%
