

Summary of Key Points
Analysis of Exit Destinations by County and Program Type
For December 2017

C. Peraro Consulting, HMIS Administrator, State of Hawaii

The HMIS Admin Team completed analysis of client exit destinations from HMIS program discharge records for the month of December 2017 (n = 903 exits). The analysis presents findings by county, over program type, and by program.

The summary tables show the total exits by destination category, along with permanent housing exit rates. Analysis also includes the total number of exits with unknown exit destination type along with the corresponding exit rates.

Assessing the level of PH placements is an essential part of determining performance for the many projects that operate within the CoC. State and federal funding is becoming increasingly tied to performance in this key area. The analysis presented within the reporting aligns with SysPM Measure 7: Successful Placement from Street Outreach and Successful Placement in or Retention of Permanent Housing. Most recently submitted SysPM data for metrics 7a1 and 7b1-2 can serve as baselines for monthly comparative analysis. Performance reporting for both CoCs can be found here: <http://www.hawaiihmis.org/reports/performance-reports/>.

Key findings of the monthly reporting include:

- In aggregate, the PH exit rate for December was 44%, with 399 of 903 exits to PH, up significantly from November (35%).
- Of the 399 PH exits, Emergency Shelter programs accounted for 133 of these exits (33%), followed by Rapid Re-Housing programs with 89 exits (22%).
- It must be emphasized that Street Outreach and Emergency Shelter project types should not be evaluated solely on exits to PH. Often, placements into institutional settings, shelters, or residential projects are positive outcomes.
- December PH rates descending by county were Hawaii (72%), Maui and Kauai (44%), and Oahu (37%).
- Homeless Prevention and Rapid Re-Housing projects had the highest PH exit rates (84% and 85% respectively) due to the inherent nature of these programs.
- The number of clients with unknown exit data improved from 281 to 248 clients in December, with the the missing exit data rate improving four points from 31% in November to 27% in December.
- Oahu and Maui had the most exits to unknown locations, with 36% (201) and 20% (34) of all discharges to these destinations, respectively. Usually exits within these categories are from ES or Outreach projects.
- Oahu Homeless Outreach programs had the highest rate of missing exits by far (80%), which can generally be attributed to auto-exiting. This rate was 71% higher than the next closest, Maui. This should continue to be monitored, especially with HPO contracts shifting towards a housing first approach and the negative impact missing exits have on the CoC's System Performance Measures.
